— ABOUT US

Your partner in supply chain and project management

Suministros Sebald, C.A. (SUSEBALCA) is an integrated-services company for the oil, gas, industrial and technology sectors, operating from Maracaibo and Caracas.

At SUSEBALCA we combine **supply chain, project management, digital infrastructure and logistics** into a single value proposition. We support our clients from needs identification to final delivery, with a firm focus on efficiency, innovation and safety. We operate nationwide.

◆ Mission

To provide integrated, high-quality solutions in supply chain, project management, supplies and technology services, meeting our clients' needs through efficient, innovative and safe management, and contributing to the sustainable development of the industrial, technology and oil sectors in Venezuela.

◆ Vision

To be leaders in the supply chain, project management, supplies and technology-services market in Venezuela and Latin America, recognized for our excellence, innovation and commitment to sustainability, contributing to the comprehensive development of our clients and the industry.

Operations for the industrial, energy and technology sectors

4

Integrated service lines

2

Offices: Maracaibo and Caracas

3

Sectors: oil-gas, industrial, technology

100%

Commitment to quality and safety

— WHY SUSEBALCA

A local partner for world-class operators

In-country presence, regulatory compliance and national and international supply chain capacity to meet the demands of oil and gas operators.

01**Local presence and response**

Teams in Maracaibo and Caracas with nationwide coverage, able to serve on site the operations of international operators and their local subsidiaries in the country.

02**Vendor qualification**

Formal quality, environmental and safety policies aligned with Venezuelan regulations and our clients' standards for supplier-qualification processes.

03**National & international supply chain**

Selection, negotiation and management of reliable suppliers to deliver materials and equipment on time and on budget, even across complex supply chains.

04**Transport and logistics**

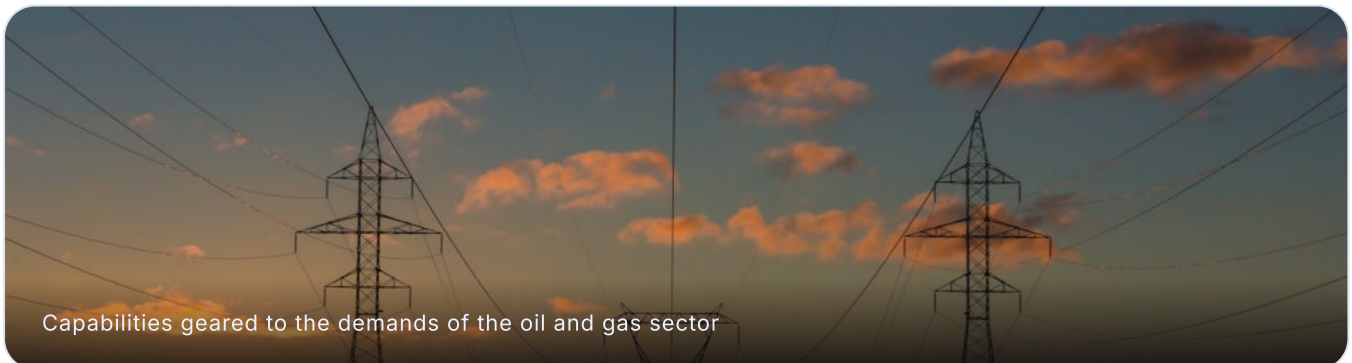

Road transport with our own monitored fleet and optimized routes; coordination of air and sea freight through partners, with full traceability.

05**Critical digital infrastructure**

Situational rooms, server rooms, structured cabling and custom software for operations that cannot stop.

06**Single point of management**

One counterpart for supply chain, projects, technology and logistics: fewer interfaces, more control and accountability from start to finish.

Capabilities geared to the demands of the oil and gas sector

— WHAT WE DO

Four service lines covering your entire value chain

From sourcing to final delivery: supply chain, project management, digital infrastructure and logistics, with quality, efficiency and safety.

Supply chain services

Selection, purchasing and management of essential materials and equipment.

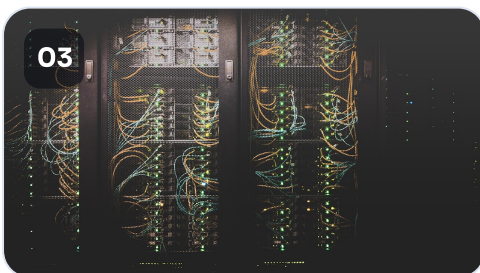

- Planning and coordination of supply projects, from need to delivery.
- Ongoing supplier evaluation by quality, cost and compliance.
- Negotiation and management of supply contracts.
- Inventory control and optimization; advisory on supply chain strategies.

Project management

Efficient planning, control and execution of complex projects.

- Strategic planning with clear, achievable objectives.
- Optimization of human and technical resources (engineering, architecture and more).
- Quality control with periodic audits.
- Open communication and proactive risk management; advanced management software.

Digital infrastructure

Complete, robust, efficient and secure technology solutions.

- Situational rooms and operations centers with advanced technology.
- Server rooms: cooling, structured cabling and power management.
- Hardware and software supply; custom application development (ERP/CRM).
- End-to-end technical support and preventive maintenance.

Transport and logistics

Own road transport and integrated logistics management — reliable and on time.

- Road transport with our own fleet, monitored and managed in real time.
- Strategic planning and optimal route design for on-time deliveries.
- Coordination of air and sea freight through logistics partners.
- Regulatory compliance, constant communication and risk mitigation.

SECTORS

Experience where it matters most

We serve the industries that move Venezuela, with quality and safety standards.

Oil & Gas

Supply chain and logistics tailored to the demands of the hydrocarbons sector, upstream and downstream.

Industrial

Supply, maintenance and projects for industrial plants and facilities.

Technology

Digital infrastructure, hardware, software and support for technology operations.

POLICIES · HSEQ

Our commitment, in writing

Policies that reflect our responsibility for the environment, quality and safety — the foundation for vendor qualification.

Environmental policy

Sustainability and compliance with Venezuelan environmental regulations.

- ✓ Efficient use of energy and water
- ✓ Waste reduction, reuse and recycling
- ✓ Pollution prevention and monitoring

Quality policy

Continuous improvement and operational excellence aligned with international standards.

- ✓ PDCA cycle and control at every stage
- ✓ Supplier management and evaluation
- ✓ Customer-satisfaction measurement

Safety policy

The safety of people, assets and operations is a priority.

- ✓ Occupational-risk prevention and control
- ✓ Legal compliance in health and safety
- ✓ Safety culture and continuous improvement

Ready for supplier-qualification processes

We document our policies and procedures to integrate into the contractor-management systems of international operators, meeting HSEQ, quality and environmental and social-responsibility requirements.

BUSINESS ALLIANCES

Backed by our partners

We work alongside trusted manufacturers and suppliers to guarantee first-class products and services.

These are only some of our business partners. Logos shown for reference, of the manufacturers and suppliers we work with.

SIEMENS	Schneider Electric	ABB
 EMERSON	 CISCO ™	Honeywell
	3M	

◆ Reliable supply chain

We select and evaluate our suppliers with strict criteria of quality, cost and compliance, to ensure availability and traceability on every delivery.

◆ Representation and supply

We manage the supply chain for leading brands in automation, energy, instrumentation, rotating equipment and information technology for sector projects.

International supply chain and multimodal logistics into Venezuela
